About Durotech Polymers

Durotech Polymers is an Australian owned and operated chemical company that specializes in the field of Polyurethane Chemistry for over 40 years. Durotech was established in 1977 with products that served the construction market. After a few years, Durotech moved into polyurethane based products supplying into serval markets to meet customer needs. In 2018, Durotech has successfully begun the forward and backward integration of various technologies and that has led to the formation of Durotech Polymers - one of the fastest growing innovative polyurethanes systems house around the world.

With over 60 staff deployed worldwide, export functions to over 15 countries and global manufacturing facilities in 2 countries, Durotech is quickly becoming a market leader and preferred choice for customers around the world.

Durotech Polymers works in 6 categories:

- Flexible Foams
- Rigid Foams
- Elastomers
- Sealants
- Adhesives
- Coatings

Durotech Polymers prides itself on outstanding product quality and customer service. Believing in end to end solutions, Durotech has and always will cement itself as the next generation polyurethane systems house.

About DOW Chemicals

Dow combines the power of science and technology to passionately innovate what is essential to human progress. The company is driving innovation that extracts value from material, polymer, chemical and biological science to help address many of the world's most challenging problems, such as the need for fresh food, safer and more sustainable transportation, clean water, energy efficiency, more durable infrastructure, and increasing agricultural productivity. Dow's integrated, market-driven portfolio delivers a broad range of technology-basedproducts and solutions to customers in 175 countries and in high-growth sectors such as pack aging, infrastructure, transportation, consumer care, electronics, and agriculture. The Company's more than 7,000 product families are manufactured at 189 sites in 34 countries across the globe. References to “Dow” or the “Company”mean The Dow Chemical Company and its consolidated subsidiaries unless otherwise expressly noted. More information about Dow can be found at www.dow.com

Durotech Polymers

AUSTRALIAN POLYURETHANE SYSTEMS HOUSE

Polyurethanes are one of the most versatile plastic materials and **Durotech Polymers** is proud to distribute and manufacture type of Polyurethanes:

Rigid Foam	**Flexible Foam**	**Elastomers**
Coatings	**Adhesives**	**Sealants**

DOW®

Authorized Distributor

DOW Polyurethanes

Dow Polyurethanes develops and delivers a broad portfolio of technologies and customized solutions to customers in a variety of industries under its Durable Science, Comfort Science and Insulation Science category brands. Applications range from industrial and infrastructure solutions, to consumer comfort solutions in flooring, furniture bedding and footwear, to energy-efficient insulation materials. The business manufactures and sells key chemical components as well as fully-formulated polyurethane systems for rigid, semi-rigid and flexible foams, and coatings, adhesives, sealants, elastomers and composites. Dow is the world's largest producer of propylene oxide (PO), propylene glycol (PG), and polyether polyols, and is a leading producer of quality aromatic isocyanates, such as MDI. Striving to meet the specific needs of its customers in their local geographic regions,

Dow Polyurethanes operates a global network of production sites and systems houses, as well as innovation and service centers. The business has an ongoing initiative to lead the industry in providing high-performance products that meet critical market needs and contribute to a more comfortable, healthier and resilient society.

Performance Advantages of Spray Polyurea

- Excellent environmental performance as no solvent is used
- Fast curing--can be sprayed on a sloping or vertical surface without dripping or forming traces of flowing
- No special requirements on the temperature and humidity of the application environment
- Able to maintain excellent elasticity in low temperature; good corrosion resistance; better wear resistance compared to epoxy and rubber
- Desired reactivity and hardness can be achieved by adjusting the formulation, with a hardness ranging from 30A to 70D
- Seamless lining without leaving any connecting locations that lead to leaking or wearing; excellent waterproof performance.
- Excellent durability; no powderisation or cracking in long-term exposure to outdoor environment

Application of Spray Polyurea

- Wastewater systems (manholes, digestors, reservoirs)
- Pipeline protection (external and internal)
- Tank cofferdam
- Tank coating
- Bridges
- Coastal steel structures
- Conveyor belts
- Wearable lining for truck and train compartments
- Theme parks
- Artificial ponds
- Swimming pools

DUROSPRAY PU340 - Hybrid Polyurea

DUROTECH Spray PU340 is a two-component Hybrid Polyurea sprayable elastomer designed for use through 1:1 volumetric spray equipment. This material can be applied to a wide variety of substrates at ambient temperature and its rapid reaction time produces a sprayed film which is touch dry in seconds. Generally used for conventional industrial waterproofing and corrosion prevention.

Features

- Fast installation
- Non-slumping
- Fast return to service
- Non-solvented high build
- Corrosion protection
- Chemical resistance
- Reduced noise transmission
- AS4858:2004 Compliant - Class III

Uses

- Wastewater system (manholes, reservoirs)
- Pipeline projection (external and internal)
- Tank cofferdam
- Tank coating
- Bridges
- Waterproofing
- Coastal steel structures
- Conveyor belts
- Wearable lining for truck and train compartments
- Theme parks
- Corrosion prevention
